

**Solve each problem.**

- 1) At the carnival, 6 friends bought 330 tickets total. If they each bought the same amount, how many tickets did each person buy?

- 2) Katie had 288 pennies. If she put them into stacks with 9 in each stack, how many stacks could she make?

- 3) Will played 2 rounds of a trivia game and scored 458 points. If he gained the same number of points each round, how many points did he score per round?

- 4) Tom had 780 pieces of candy. If he split the candy into 2 bags with the same amount of candy in each bag, how many pieces would each bag have in it?

- 5) Haley's school sold 832 dollars in raffle tickets. If each ticket cost 8 dollars, how many tickets did they sell?

- 6) A farmer had 315 seeds to plant. He planted the same number of seeds each day and it took him 9 days to plant them all. How many seeds did he plant per day?

- 7) Adam made 974 dollars mowing lawns over the summer. If he only had 2 customers and each person paid the same amount, how much did each person pay?

- 8) Luke had 125 baseball cards in 5 binders. If each binder has the same number of cards, how many cards are in each binder?

- 9) There are 638 people attending a luncheon. If a table can hold 2 people, how many tables do they need?

- 10) Edward's dad bought 800 centimeters of string. If he cut the string into 5 equal pieces, what would be the length of each piece?
