

Solve each problem.

Answers

- 1) Faye earned three points for each bag of cans she recycled. If she had ten bags, but didn't recycle seven of them, how many points would she have earned?
- 2) George invited ten friends to a birthday party, but seven couldn't come. If he wanted to buy enough cupcakes so each person could have exactly five, how many should he buy?
- 3) A chef needs six potatoes for a meal. He has already cooked three. If each potato takes six minutes to cook, how long will it take him to cook the rest?
- 4) Dave earned five dollars for each lawn he mowed. If he had four lawns to mow, but forgot to mow two of them, how much money did he actually earn?
- 5) Oliver had three action figures, but needed twelve total for a complete collection. If each one costs \$6, how much money would he need to finish his collection?
- 6) At the fair Tom bought eleven tickets. After riding the ferris wheel he had four tickets left. If each ticket cost eight dollars, how much money did Tom spend riding the ferris wheel?
- 7) Jerry had nine video games but four of them weren't working. If he wanted to sell the working games for \$3 each, how much money could he earn?
- 8) A trivia team had twelve members total, but during a game four members didn't show up. If each member that did show up scored five points, how many points were scored total?
- 9) A new building needed nine windows. The builder had already installed five of them. If it takes three hours to install each window, how long will it take him to install the rest?
- 10) A worksheet had eight problems on it. If a teacher had ten worksheets to grade and had already graded eight of them, how many more problems does she have to grade?

1. _____
2. _____
3. _____
4. _____
