Examining Two Values Relative Size

Name:

Solve each problem.

1) Given the numbers 77 and 60, how much would you need to subtract from the larger number to make it even with the smaller number?

1. _____

2. _____

2) Given the numbers 43 and 70, how much would you need to add to the smaller number to make it greater than the larger number?

3. _____

3) Given the numbers 98 and 62, how much would you need to add to the smaller number to make it greater than the larger number?

4. _____

5. _____

4) Given the numbers 92 and 26, how much would you need to add to the smaller number to make it greater than the larger number?

6. _____

7. _____

5) Given the numbers 50 and 49, how much would you need to subtract from the larger number to make it even with the smaller number?

8. _____

6) Given the numbers 21 and 12, how much would you need to add to the smaller number to make it greater than the larger number?

9. _____

10. _____

7) Given the numbers 24 and 65, how much would you need to add to the smaller number to make it even with the larger number?

11. _____

8) Given the numbers 92 and 77, how much would you need to add to the smaller number to make it greater than the larger number?

12. _____

9) Given the numbers 19 and 92, how much would you need to add to the smaller number to make it greater than the larger number?

10) Given the numbers 68 and 37, how much would you need to subtract from the larger number to make it less than the smaller number?

11) Given the numbers 68 and 64, how much would you need to add to the smaller number to make it greater than the larger number?

12) Given the numbers 63 and 35, how much would you need to add to the smaller number to make it even with the larger number?

Solve each problem.

1) Given the numbers 77 and 60, how much would you need to subtract from the larger number to make it even with the smaller number?

1. _____ **17** _____

2) Given the numbers 43 and 70, how much would you need to add to the smaller number to make it greater than the larger number?

2. _____ **28** _____

3) Given the numbers 98 and 62, how much would you need to add to the smaller number to make it greater than the larger number?

3. _____ **37** _____

4. _____ **67** _____

4) Given the numbers 92 and 26, how much would you need to add to the smaller number to make it greater than the larger number?

5. _____ **1** _____

6. _____ **10** _____

5) Given the numbers 50 and 49, how much would you need to subtract from the larger number to make it even with the smaller number?

7. _____ **41** _____

8. _____ **16** _____

6) Given the numbers 21 and 12, how much would you need to add to the smaller number to make it greater than the larger number?

9. _____ **74** _____

7) Given the numbers 24 and 65, how much would you need to add to the smaller number to make it even with the larger number?

10. _____ **32** _____

11. _____ **5** _____

12. _____ **28** _____

8) Given the numbers 92 and 77, how much would you need to add to the smaller number to make it greater than the larger number?

9) Given the numbers 19 and 92, how much would you need to add to the smaller number to make it greater than the larger number?

10) Given the numbers 68 and 37, how much would you need to subtract from the larger number to make it less than the smaller number?

11) Given the numbers 68 and 64, how much would you need to add to the smaller number to make it greater than the larger number?

12) Given the numbers 63 and 35, how much would you need to add to the smaller number to make it even with the larger number?
